Annotated Variants Help

This tab-separated value (TSV) file contains variants registered with dbSNP with assigned RSIDs that have been annotated by PharmGKB. This is not a complete list of dbSNP variants The columns in the file are:

- 1. Variant ID = The PharmGKB identifier for this variant
- 2. Variant Name = The PharmGKB name for this variant
- 3. Gene IDs = The PharmGKB identifiers for genes associated with this variant
- 4. Gene Symbols = The HGNC symbols for genes associated with this variant
- Location = The location of this variation on a reference sequence (either RefSeq or GenBank), if available. HGVS format when applicable
- 6. Variant Annotation count = The count of Variant Annotations done on this variant
- 7. Clinical Annotation count = The count of all Clinical Annotations done on this variant
- Level 1/2 Clinical Annotation count = The count of Level 1 or Level 2 ("top") Clinical Annotations done on this variant
- 9. Guideline Annotation count = The count of Dosing Guideline Annotations of which this variant is a part
- 10. Label Annotation count = The count of Drug Label Annotations in which this variant is mentioned
- Synonyms = a comma-separated list of synonyms for this variant. Includes HGVS names, retired RSIDs, and other names
